

RM-10784

I am OPPOSED to this RM-10784

The petitioner is requesting elimination of Element 1 from the rules except for Extra class applicants.

There already exists opportunities to obtain licensing without the cw requirement. The petitioner is eroding the skills needed to provide a viable response to unusual circumstances requiring knowledge of cw for the majority of license classes. The Public Service requirements of our licensing aspects and functionality of our responsibilities must not be arbitrarily diminished.
